Eng/Ling 4600/7600*	Structure of American English (3)
Statistics	Recommended course at MU: ESC PS 7170 Introduction to Educational Statistics (3)

Students who enter the program with an undergraduate degree in an area other than communication disorders typically take these courses during their first year and a half of the MHS program. Students who majored in communication disorders at another college or university may have to take one or more prerequisite courses as part of their MHS program. The graduate advisor, with help from the student, will determine if any undergraduate courses are required for the student's MHS program.

* Any of these courses may be counted as a graduate elective towards the MHS degree if taken at the graduate level.

**This course may be audited.
