Please calculate your Grade Point Average (GPA) based on your most recent 60 hours of college/university coursework. To do this, begin with the most recent semester and calculate back through the semester which corresponds most closely to 60 hours (do not figure your GPA on less than 58 hours and do not divide a semester; all courses in each semester used for calculation must be counted). Divide total grade (or quality) points by total semester hours to calculate your GPA.

GPA on last 60 hours: \_\_\_\_\_

*(It is important that you calculate this GPA by the method above as it is the method by which we will confirm your GPA.)*

List any work experiences (employment or volunteer efforts) that you feel are relevant to your proposed program of study in the field of Communication Science and Disorders:
