

Clinical Instructor Feedback of Academic Program

In order to improve our curriculum and overall service to the clinical sites, we need input from those individuals working with our students. It would be of great service to our department if you could give us your comments below.

In what areas do you think this student was especially well prepared?

In what areas do you think this student's preparation was less than adequate?

Do you have any suggestions for the Director of Clinical Education that would have improved the clinical education process from your point of view?
