Clinical Question Worksheet
 MU Fax Number: (573)884-8369

Student Name:
Clinical Facility:

(Please return by February 15, 2007)

Please complete the following grid and general intent.

Component	Fill in here: question #1	Fill in here: question #2
Patient or problem being addressed (eg diagnosis, type of problem, etc)		
The Intervention * (test/diagnostic, prognostic factor, treatment, etc)		
Comparison * of the intervention (test/diagnostic, prognostic factor, treatment, etc) if appropriate		
Clinical Outcome to measure or achieve		

*If you do not know what to put here, the student will help fill in based on the “general intent of the question” below and discussion with you.

General Intent of Question #1:

General Intent of Question #2:

Resources available to the student at your site (Internet, library, etc.):

The following is an example of how to complete this worksheet.

Component	Fill in here
Patient or problem being addressed (eg diagnosis, type of problem, etc.)	<i>For young patients s/p ACL reconstruction</i>
The Intervention (test/diagnostic, prognostic factor, treatment, etc.)	<i>CPM</i>
Comparison of the intervention (test/diagnostic, prognostic factor, treatment, etc.) if appropriate	<i>compared to early active movement</i>
Clinical Outcome to measure or achieve	<i>effective in obtaining full ROM</i>

<p><u>General Intent of Question: 1</u> <i>want to know if CPMs are worth using fro ACL patients. Then the student will develop the question:</i> For young patients s/p ACL reconstruction is CPM, compared to early active movement, more effective in obtaining full ROM?</p>
